Re: my own scientific grade at stake, it is the Rembrandt, the implement of 29 years, wish to get reviewed my 98 pages thesis 13-03-2017 Raymond Burt

Sirs, have indeed endeavored to succeed on a research project, do know am not as succinctly qualified to add much in my findings, am not a wealthy criteria needs of your wealth of knowledge as a contributor to my grade,...i 've studied physics, astrophysics & technician & microcircuitry, processors basically a computer physics ideas there...i 'm not Stephen Hawking's PHD but am confined to a chair...i wish it if at all possible of your discreet evaluation of my 97 pages thesis/

study as i pronounce to you, had been busy elaborating, it has links i am sure it can be proof of my innate dedication, i had been named and told, shimmied as Quarter-mass, a nut if its not...,it is confirmed, and i might be there to summarily define all parts of these works, & 4 work books..., i have been told the subject matter is plagiarism, it is not. i might be unusual but it is solely my intent to be opening up the eyes of the opinion, i had been strongly felt, through NASA and the SETI institute wherefore am an member, summary for my research is below

Most of the paper fold is the matter replacement of light molecular energy, i plan to enlighten bodies if you will ", molecular restraints in the body bonding shape, a rectangular metaphor. flow discreetly, may a light speed encroach on another, thru a planet any objects, Newtons plotted the painstaking harbor and the ingenuities, do we approach the speed of the neuron disorder, it is not sirs. our neurons may, might be trans versed and the cloning permitted in egalitarian space/ time, do we hold hyper fold, swivel reaction times: Do we sponsor the life in Object collusion inaction vs action, a replicon we endow the energy freehold, we, do we intently and the spherical vortex at a quadrant in time to synthesis of

Dear SETI, Mentors!!

Please take care of my duty,, i ask is he lame, yes...,Do plead is it useful, i might do a deal...we are physics professors here...P.H.D's please honour my arguments here with repatriations.....

energy is threefold: its conducive to speed: I eliminated Light: in a cooperativeness,  
it makes the vortices: I means a hole in matter, condensed it makes the goad  
particle as such time, do we forget time is the stagnant, intervals between it and the  
human being: is the suggestive light/ time frequencies: is time at least able to  
eliminate our Specie, is our oneness equilibrated as the atom: if not the collective of  
memory we did it whence we're youthful, we called it daydream islanders , Sport?  
Does our movement through time discriminate, no!

neu/ i0 root Ba10\*(Ze^paraflex:eS is instigate Light speed, we conjoined theory:  
eliminate a particle is in us: time vs light hypothesis: do in eventually, we sustain  
altered space/ time/ we coordinate time equilateral between parallel lineage: thus  
warp, time Spacie 7 can be coerced

very nicely placed: Mistake, we cyclonic plasma, representative at the speed of  
light,. we thus tumble rather spectral neurotic behavior topples, we are induced in a  
stroke, a metabolic ship travels, shrinks to a nuclei, we become float free of time:  
these instigated the only parcel to pass through a vector in space at light / time  
speed
